

Slovenian NMR Centre

@ National Institute of Chemistry

vabi na **PREDAVANJE**:

Professor Giuseppe Legname

Laboratory of Prion Biology, Neurobiology Sector, Scuola Internazionale Superiore
di Studi Avanzati (SISSA), Trieste
Italian Institute of Technology, SISSA Unit, Trieste
ELETTRA Laboratory, Sincrotrone Trieste S.C.p.A., Basovizza
Italy

z naslovom:

Sailing unexplored compartments: The tale of anchorless prions

v četrtek, 5. aprila 2012 ob 11:00 uri

v Fegeševi sobi na Kemijskem inštitutu, Hajdrihova 19, Ljubljana

Kratek povzetek:

The spontaneous generation of anchorless prions has been recently described. Contrary to what has been thought so far, the infectious agent does not require the presence of the cellular prion protein to exert its pathogenicity. This seminar will revise and discuss our current understanding of infectious prions devoid of most post-translation modifications.

Predavanje bo v angleščini.
